V41 Traceability of missing identifier positions

183 positions outside the reconstructed screening index

Traceability category	Positions	What the records establish
Found in EUA ADSL	**36**	All have RANDFL=N: explicitly nonrandomized. Two also appear in BLA DM.
Found only in BLA DM	**2**	US3912225 and US3982056. Planned and actual arms, treatment dates and consent dates are blank.
Found in neither comparison roster	**145**	143 internal positions and 2 assumed leading positions; allocation and disposition remain unresolved.

Counts describe missing index positions, not a count of missing randomized participants.
